

Sharepoint Implementation Questions

[Has anybody implemented sharepoint portal at the work place and got any suggestions on best practices or does and don'ts](#)

Answer :: Sorry, i haven't tried it here, but if you do, do it, can you give me some info about it? [Read More](#)

[I am trying to implement Sharepoint in our office. I have it installed, now I just need to set up the site. We currently have an intranet, and I was wondering if there was some way for me to copy and paste what we have on the intranet to somewhere in Sharepoint to transfer it over? THANKS!!!](#)

Answer :: Not that I know of. You will be able to take some pieces, but you will not be able to just cut and paste the site.

I'm assuming you mean that Sharepoint will now be your site, and you want your content to have the same content that you currently have on your normal site. [Read More](#)

[And which online help technologies or tools that is best to implement it? I intend to run it on Microsoft Sharepoint Server 2007 using CHM Decoder help authoring tools.](#)

Answer :: On each web-part view, on each page that has that web-part, you can direct SharePoint to direct a user to a help file.

Go to Modify Web Part, open the advanced section, and add the URL of your help file to that web-part in the help section. [Read More](#)
